SUMMARY

Principal UX Designer and Product Architect with 13+ years across B2B SaaS, marketplaces, and enterprise products for clients including CHANEL, AT&T, and Fnac. I find the leaks in user journeys and re-architect flows for measurable ROI, scaling marketplace orders 9x at Sobrus and cutting candidate dropout from 40% to 12% at Gentis. I design **conversational and agentic AI** features that turn multi-step workflows into a single prompt or voice command, and I build **agent-ready design infrastructure**: MCP-connected design systems and gated agent workflows that turn analytics into evidence-backed design decisions.

CORE SKILLS

Agentic AI & LLM Systems	Agent workflow orchestration, human-in-the-loop approval gates, MCP (Model Context Protocol) servers and integrations, context engineering, prompt engineering, Claude Agent SDK / Claude Code, local LLM workers
Conversational AI Design	Chat and voice-driven assistants, prompt-to-action workflows, AI support and reporting assistants, LLM-based candidate matching
Design Systems Architecture	Multi-layer tokens (Primitive, Semantic/Alias, Component), agent-readable design systems, automated accessibility auditing, design governance, Tailwind + CVA, shadcn/ui
Research & Analytics	Contextual inquiry, quantitative and qualitative analysis, journey mapping, service blueprinting, A/B testing and experiment design
Product Strategy & Growth	Conversion rate optimization, funnel analysis, growth UX, monetization and credits systems, stakeholder alignment
Information Architecture	Complex data mapping, structural taxonomy, navigation logic for B2B SaaS, content strategy
Product Leadership	Weekly design reviews, technical feasibility audits, cross-functional leadership, mentorship, sprint definition, roadmapping
Tools	Figma, Tokens Studio, Storybook, Claude Code, Mixpanel, Microsoft Clarity, PostHog, GA4, Hotjar, Node.js

EXPERIENCE

Principal UX Designer · Sobrus	Jun 2025 - Present · Rabat
Marketplace Growth: Increased marketplace orders 9x year-over-year by simplifying the procurement flow and prioritizing features that grew Average Order Value (AOV). Sobrus AI Chatbot (Conversational AI): Designed an in-app AI assistant that gives pharmacists platform support and how-to guidance, and generates daily sales, purchase, and inventory reports on demand, directly in the chat. Ordering Flow: Reduced the steps to complete an order and introduced “Saved Offers” and “Abandoned Cart” reminders so pharmacists finish tasks faster. Inventory Wizard: Turned a manual, complex inventory bottleneck into a guided, step-by-step digital process.	

- **Contextual Discovery:** Ran weekly on-site pharmacy visits for contextual inquiry, identifying real-world pain points and validating roadmap topics directly with owners.
- **“Sun” Design System:** Built from scratch on a 3-layer token architecture (Primitive, Alias, Component); partnered with developers to implement tokens on shadcn/ui and React Native Reusables, doubling development speed.
- **Design Leadership & Prioritization:** Led weekly design reviews to validate sprint work, and set roadmap and sprint priorities from Microsoft Clarity and Mixpanel behavior data.

Sr. Product Designer · Gentis

Jan 2024 - Jun 2025 · Casablanca

- **Conversational AI Recruiting Assistant:** Designed a prompt- and voice-driven assistant that lets recruiters run their hiring pipeline through conversation: creating vacancies, filling them with the highest-matching candidates, and moving candidates across kanban recruiting stages.
- **AI Sourcing Automation:** Designed a prompt-driven agent that ranks candidates by matching score and automated the selection-to-interview pipeline, saving hiring managers up to 11 hours per week.
- **AI Vacancy Generator:** Replaced manual job creation with prompt-based generation, cutting time-to-post from 1 hour to ~12 minutes.
- **Funnel Optimization:** Cut candidate dropout from 40% to 12% by re-engineering the scheduling journey, shrinking the booking cycle from 3 days to ~15 minutes.
- **Wiggli Credits & Tokens:** Designed the credits system that manages platform billing and encourages recurring user actions.
- **Unified Communication:** Centralized recruiter-candidate messaging into a single, streamlined tool.
- **Onboarding & Validation:** Reached a 7.6/10 adoption score among first-time users through contextual onboarding guides and post-task surveys.

Lead Product Designer · Freelance, Web3

Sep 2022 - Dec 2024 · Remote

- **Hadeswap Liquidity Architecture:** Designed the UX for the first automated market maker (AMM) for NFTs on Solana, pioneering NFT liquidity pools.
- **DeFi Simplification:** Made DeFi mechanics accessible to retail users, driving growth in trading volume and NFT market share.
- **Minting & Wallet Flows:** Researched Solana and Metaplex Candy Machine protocols to design secure, high-velocity minting flows, and optimized transaction signing for Phantom and other Solana wallets.

Lead UX/UI Designer · 4D

Dec 2019 - Jul 2022 · Rabat

- **Fnac Product Comparator:** Built the advanced product comparator by auditing historical data to remove decision-making friction.
- **Probiocal (Medical SaaS & E-commerce):** Designed the web app and optimized lab e-commerce, reducing checkout churn by 9.7%.
- **Information Architecture:** Restructured the blood-analysis results experience so professionals can interpret results more easily.
- **Career Card:** Designed a gamified mobile experience for instant employee recognition via QR code scanning.

UX/UI Designer · IPPON Technology

Feb 2018 - Oct 2019 · Marrakech

- **CHANEL:** Designed an internal educational app that trains employees on upcoming drops, based on research revealing customer knowledge gaps.
- **European Judo Union:** Led the website redesign and overhauled “Live Competitions” with the “Tatamis” multi-stream system.
- **French Foundation of Sport:** Designed a private social app for athletes, reaching a 70% user activity rate at launch.

UX/UI Designer · 4D

Feb 2014 - Jan 2018 · Rabat

- **AT&T (SBC TARS):** Designed a modern web interface for a conflict-management application used by thousands of US field technicians.
- **Italia Rails:** Designed a ticketing app that modernized booking for high-volume travelers.
- **Wakanda:** Improved the UX of 4D's internal developer tools to boost productivity.

Co-Founder & Full-stack Designer · Themevan

Mar 2010 - Jun 2014 · Remote / China

- **ThemeForest Elite Author:** Co-founded a boutique WordPress agency and scaled it to thousands of customers worldwide through premium commercial themes, owning the full design and development lifecycle.

AI SYSTEMS · INDEPENDENT R&D

Design Experiment Harness · Agentic design workflow

Ongoing · Experimental

- Architected a 15-stage, gate-driven workflow (Discover → Frame → Make → Validate → Learn) that wraps AI agents around the product design process, with human-approval gates, an audit trail, journey maps, and a learning log.
- Orchestrator/worker setup: Claude Agent SDK / Claude Code as orchestrator, a local LLM (Hermes) for high-volume tasks, PostHog MCP for analytics and experiments, and Storybook MCP for component discovery.
- Added a living project-profile layer with explicit rules separating autonomous agent updates from changes that require human approval.

Vitamin-Z Design System · Agent-first design system

Ongoing · Experimental

- Three-tier token architecture (primitive → semantic → component) with private primitives and a build-time "primitive-escape" check that blocks token leakage.
- 24 automated accessibility audit checks across four theme combinations (light/dark × two brands).
- MCP server with CLAUDE.md and CONTEXT.md instruction files so AI coding agents consume the system correctly; built on Tailwind and CVA, with a Node.js token-sync script for the Figma Variables REST API.

CERTIFICATIONS

- **Google UX Design Specialization** · 7 courses, from UX research to high-fidelity prototyping in Figma
- **IBM** · Enterprise Design Thinking Practitioner; Product Management: An Introduction
- **SkillUp Online (by IBM)** · Product Management: Foundations & Stakeholder Collaboration; Initial Product Strategy and Plan

EDUCATION

Moulik Group · Information Technology	2011 - 2013
FSJES University · Economics & Finance (BAC+2)	2010 - 2012
Mohamed VI High School · Accountancy & Management (Baccalaureate)	2008 - 2009
